Backlog Refinement Summary - Sprint 1

## BACKLOG REFINEMENT SUMMARY: SMART-STOCK

### Sprint 2 Priority Items (per SS-2)

| Refinement Agenda | User Story / Jira ID | Status |
|---|---|---|
| **User Authentication & Role Access** | User Authentication (Sign in / Sign out) `SS-13`, Register Hardware Admin / Cashier Account `SS-16` | 🟢 **Refined** |
| **Inventory Catalogue & Item Search** | View Stock Inventory Catalogue `SS-17`, Search and Filter Hardware Items `SS-18` | 🟢 **Refined** |
| **Stock Management & Transactions** | Add New Product / Item to Inventory `SS-19` | 🟢 **Refined** |
| **Point of Sale & Transactions** | Process Sale (POS Checkout Flow) `SS-33` | 🟢 **Refined** |
| **Role-Based Access & Security** | Enforce Role-Based Access `SS-36` | 🟢 **Refined** |
| **Stock-In / Receiving** | Record Stock-In / Receiving of New Supplies `SS-40` | 🟢 **Refined** |

*Criteria met for "Refined" on the items above: detailed BRD/Tech Spec in place, user story + acceptance criteria written, test cases in the Test Plan, and Local/Test environments available.* ***Remaining step: team-wide review and alignment session*** *(BA, SA, QA, DevOps/SRE, PM) — schedule before Sprint 2 planning to formally close this out.*

### Other Backlog Items (not yet committed to Sprint 2)

| Refinement Agenda | User Story / Jira ID | Status |
|---|---|---|
| **Stock Alerts & Threshold Monitoring** | Low Stock Alert Notifications `SS-20` | ⚪ **To Refine** |

| | | |
|---|---|---|
| **Product Maintenance** | Edit and Update Product Details `SS-21` | ⚪ **To Refine** |
| **Supplier Management** | Add and View Supplier Records `SS-22` | ⚪ **To Refine** |
| **Reporting & Dashboard** | Admin Dashboard Overview `SS-23`, System Audit Trail & Transaction Logs `SS-24`, Export Inventory Reports to PDF/Excel `SS-25` | ⚪ **To Refine** |
| **Point of Sale & Transactions** | Downloadable Transaction Summary `SS-34` | ⚪ **To Refine** |
| **Demand Forecasting** | Generate Demand-Based Restock Suggestions `SS-35` | ⚪ **To Refine** |
| **Role-Based Access & Security** | Password Security Hardening `SS-37` | ⚪ **To Refine** |
| **Inventory Adjustments** | Manual Stock Adjustment (Lost/Damaged Items) `SS-38` | ⚪ **To Refine** |
| **Infrastructure** | Set Up Regular Database Backups `SS-39` | ⚪ **To Refine** |

HIGHLIGHTS

| ⚠️ RISKS | ⛔ BLOCKERS |
|---|---|
| **Inaccurate Manual Stock Entry:** Risk of cashier/staff making typo errors in item quantity during stock-out transactions. **Database Performance:** Potential slowdown during peak hours with concurrent inventory reads/writes. | **Sample Inventory Dataset:** Pending actual list of hardware items and categories to seed the initial database. **Staging/Production Environments:** Still marked "Planned" in the Infrastructure doc — only Local and Test are live. |

*Updated after applying Sprint-2-readiness fixes: BRD and Test Plan migrated to shared space with full content, SS-23 given a full description, SS-2 populated with the identified priority item*

*list, and real sample test cases added to the Test Plan.*
